California Institute for Regenerative Medicine
San Francisco State University

Bridges to Stem Cell Science Master’s Program

Preparing future researchers to advance regenerative medicine, stem cell therapy and gene editing technology

Program Highlights

- 2-year Master of Science program in Biomedical Science
- Academic course work in stem cell biology, biotechnology, management, cell and molecular biology
- 12-month master’s internship project in stem cell research
- Training opportunities at UCSF, Stanford, UC Berkeley and Bay Area biotech companies
- 1 Year CIRM fellowship includes $36,000 stipends, $8,000 tuitions, $3,000 research-related funds, and $1,000 travel

Application Deadline:
October 1st
